

The Chemical Ecology group of the
Institute of Plant Sciences (UniBe) offers

2 Student assistant positions (Hilfswissenschaftler(in), HIWIs)

The group of Chemical Ecology focuses on how chemistry drives the interactions between organisms. The ultimate goal of our research is to tackle societal challenges such as food production, sustainable agriculture, climate change, and human health. The group is highly dynamic and international and provides a great environment for research.

We are currently looking for **two enthusiastic and motivated students** to support our projects. Good English/or/German/or/French skills are required.

The positions are as follows:

- 1) 20%: supporting lab work (grinding and extracting plant, insect, or mouse samples for metabolomic analyses, RNA extractions for qPCR)
- 2) 10%: nematode rearing

Start: July 1st, 2022

Duration: 6 months.

Place: Institute of Plant Sciences, University of Bern

Interested in joining us? Send a CV and a short description of your motivation to Prof. Christelle Robert (christelle.robert@ips.unibe.ch) until June 30th.
